

National Membranous Nephropathy (MN) Patient Forum

Dear

As you have attended a previous meeting of the Manchester MN patient group or have consented to the National Renal Rare Disease Registry (RaDaR) we would like to invite you to the first National Patient Forum for patients with Membranous Nephropathy (MN).

The purpose of facilitating a national group forum is to allow patients with MN from all over the UK to provide an insight into their views and feelings on a variety of issues such as patient involvement in research, current and future treatments and quality of life issues. The views and opinions of patients are very important to us and your input through a National MN Patient Forum would be invaluable in contributing to future treatments and research at the national level..

We are therefore inviting you to attend a meeting on **Saturday 19th March 2016 at the NOWGEN Centre - 29 Grafton Street, Manchester, M13 9WU**. The event is free for you and a guest. Light refreshments will be served and any travel expenses incurred will be reimbursed (on the production of receipts).

I have enclosed the programme and booking details for your information.

We do hope that you will be able to join us.

Prof Paul Brenchley

Chair of MN RADAR Steering Group
Renal Research Labs
Manchester Royal Infirmary
